

Society for Environmental Geochemistry & Health

FIRST NOTICE

2009 European Meeting

27th & 28th August 2009, Dublin, Ireland

The 2009 annual European meeting of the **Society for Environmental Geochemistry and Health (SEGh)** is being held in conjunction with the annual meeting of the **International Society for Environmental Epidemiology (ISEE)**

ISEE meeting 25-29 August 2009: <http://www.isee2009.ie/home/>

*The SEGh programme is under active development but will include another **MULTITUDE** workshop, sessions with oral presentations and poster displays (<http://www.segh.net/calendar.php>).*

The ISEE theme is **food**, but papers covering the usual SEGh sessions across the wide range of interactions between environment and health will be welcome. The **MULTITUDE** workshop has previously been successfully held in **Liverpool in 2007** (*Understanding environmental contributions to the burden of disease*) and **Athens in 2008** (*From risk assessment to risk response*). See the SEGh website for further details.

Abstract submission date for SEGh sessions is **31st May 2009**.

Details of the submission process will be available on the ISEE & SEGh websites soon.

Delegates wishing to submit abstracts for the ISEE sessions as well, but should note that the abstract submission date for the oral and poster presentations for the ISEE sessions is **16th March 2009**; details of this can be found on the ISEE website.

Conference registration and accommodation will be administered through ISEE and it should also be noted that August in Dublin is the height of the tourist season. Dedicated conference accommodation is available at the conference venue, University College Dublin, at a reasonable rate, definitely lower than in nearby hotels or bed and breakfast establishments.

Alex Stewart (health) & Andrew Hursthouse (geochemistry)

Convenors (on behalf of SEGh Europe), February 2009
